# Operating System Practice

Dr. Phan Thanh Hien, DSA, USTH
Dr. Pham Duc Binh, DSA, USTH
Dr. Nguyen Le Dung, DSA, USTH
Dr. Nguyen Xuan Thanh, DSA, USTH
M.Sc. Tran Anh Tu, AE, USTH

# Practice 1: Computer Hardware

- **CPU**
- **Storage**
  - RAM: Total, free
  - Hard disk: Partition, used, free
- **I/O devices**
  - Keyboard, mouse
  - Display: Resolution, colors
  - Printer, scanner, camera
  - Network
- **Driver**
  - Install, uninstall (printer)

# Practice 1: Work with Windows OS

1. **Get basic information about your computer:**
   - Type of OS, version
   - Computer name
   - System: processor, RAM, system type (32-bit or 64-bit CPU)
2. **Add/remove new account**
3. **Install new font**
   - Access fonts.google.com
   - Choose a font
   - Check the fonts installed on your computer
   - Install **that** font if it is not available
4. **Create/Delete file or folder**
   - Create file *OSPractice.txt* in ***Informatics*** folder on the Desktop
   - Delete file or folder temporarily/permanently
5. **Show/hide file extension**
6. **Show/hide hidden files or folders**

# Practice 2: Computer Software

7. **Install a software (Total Commander)**
   - https://www.ghisler.com/download.htm
   - Operate with Total Commander: create/delete file or folder, compare directories, pack/unpack file, split/combine files
8. **Using Task Manager**
   - To view performance and processes
   - To terminate a process
9. **Using Windows Command Prompt**
   - To get system information
   - To create/delete folder or file
10. **Uninstall all installed things.**

# List of commands

**cd** folder_name → *access a folder*
**cd ..** → *access the parent folder*
**dir** → *list all files and folders (ls)*
**mkdir** Folder_name → *create a folder*
**rmdir** Folder_name → remove a folder
**type nul>***filename.extension* → *create a file (nano)*
**del** filename.extension → *delete a file (filename.extension)*

**For MacOS visit:**
*https://enexdi.sciencesconf.org/data/pages/windows_vs_mac_commands_1.pdf*

# practice

create a file *OSPractice.txt* in the folder *Informatics* on your *Desktop*

1. open the Command Prompt
2. Access the Desktop folder: **cd** C:\Users\your_user_name
   **cd** Desktop
3. **mkdir** Informatics
4. **cd** Informatics
5. **type nul>** OSPractice.txt
6. **del** OSPractice.txt
7. **cd** ..
8. **rmdir** Informatics

# Loop commands

```
1.  FOR /L %i IN (1,1,100) DO type nul>NguoiYeuCu%i.txt
2.  FOR /L %i IN (2,2,100) DO del NguoiYeuCu%i.txt
3.  del *.*
```

MacOS:

```
1.  for i in {1..100}; do touch OSPractice$i.txt; done
2.  for i in {1..100}; do rm OSPractice$i.txt; done
```

# Home work

- Partitioning disk
- Disk Cleanup
- Disk Defragmentation for HDD
